**Best for your business.
Best for our planet.**

**Avery's Recycled Labels give
you the best of both worlds.**

Made from 100% recycled material, yet still with our technology that prevents misfeeds and printer jams, we're proud to offer an eco-friendly alternative that really works.

FSC® Labels

Help us protect the environment

Products carrying the FSC® label are independently certified by the Forest Stewardship Council® to assure consumers that they come from forests that are well managed to meet the economic and ecological needs of present and future generations. We offer a range of FSC® certified products ranging from addressing labels to indexing products, noting that we are helping organisations like the FSC® to make a difference with responsible management of forests.

Look out for the FSC 'tick tree' logo on our products.

Our Labels. Your World.

Designed for all aspects of your world

We have been supporting homes and businesses, big and small, for nearly 9 decades. From our very first labels in 1935, we've evolved our range to meet your needs. For us, it's always been about offering simple solutions, designed to make your life easier.

Helping you organise your work and life

At home or at work, our simple labelling solutions help solve the 'overwhelm'.

Order the labels you need, your way

Buy blank labels by the sheet online and choose the shape, size, material and quantity you need. You decide, we despatch!

For better results, faster

Our free Avery Design & Print online tool makes creating professional-looking labels easy. We take care of the process, so you can enjoy the results.

Enjoy stress-free printing

With our UltraGrip® and JamFREE™ technology, wave goodbye to the stress of misfeeds, skewing and printer jams.

Cut down on wastage

Our label technology helps you cut down on re-prints and ink, saving you both time and money. It also happens to be kinder to the environment.

Our Commitment to Sustainability

At Avery, we're committed to looking after our planet and our people. From selecting materials from sustainable sources to manufacturing locally to reduce CO₂ emissions, we're continually measuring our environmental impact and striving to improve.
